# Oilseeds: World Markets and Trade

## Strong U.S. Soybean Exports to Date Should Lead to Marketing Year Record

### U.S. Soybean Exports to Date by Destination

Figures are based on US export sales as of March 29th  
and include both accumulated exports and outstanding sales

The strong pace of U.S. soybean shipments this marketing year to date should help U.S. soybean exports reach a record level of 26.9 million tons. Through the end of March, U.S. soybean shipments totaled 21.6 million tons, 1.7 million tons more than at the same time last year. In addition, U.S. exporters have secured commitments from foreign buyers for another 2.9 million tons this marketing year, which will end August 31. However, the pace of U.S. soybean exports is expected to slow in the coming months. The large wave of South American production that is beginning to enter the market should cause the current large gap between this year's exports and last year's to narrow, although still be record large. Strong demand from China has been the primary driver in the increased exports to this point. Through the end of March, the U.S. has shipped over 5.3 million tons of soybeans to China, and has received commitments for an additional 450,000 tons. Last year at the same time China had purchased 3.2 million tons. Increased U.S. exports have also been recorded to Mexico, the Middle East, and North Africa compared to last year, while decreases are seen to the EU, and Asia, excluding China.

## **Situation and Outlook**

---

Global oilseed production estimates for 2000/01 rose slightly this month to 306.8 million metric tons. A 1.0-million-ton increase in the Argentine soybean crop to 26.0 million tons accounts for most of the adjustment and is due to higher yields as a result of nearly ideal weather conditions. This is the second month in a row that Argentine production estimates have risen by 1.0 million tons. Sunflowerseed production continues to fall short of earlier estimates, and is down this month due largely to a 500,000-ton reduction in Argentina's sunflowerseed crop.

The global oilseed trade forecast was increased 447,000 tons to 65.0 million tons. The increase was due largely to higher soybean exports by the United States, and Argentina. U.S. soybean exports for 2000/01 are forecast at 26.9 million tons this month reflecting continued growth in China's import potential. The larger global oilseed import forecast includes a net increase in soybean imports of more than 700,000 tons with China alone 900,000 tons higher, and declines of 100,000 tons to both Latin America and South Korea. This higher growth reduces the impact of large foreign supplies on U.S. soybean exports.

World oilseed crush for 2000/01 was also raised this month, increasing 216,000 tons to 252.0 million tons. Crush estimates increased or were unchanged for all oilseeds except sunflowerseed, which declined 7,000 tons. Global oilseed ending stocks for 2000/01 rose to 32.5 million tons and reflect adjustments in soybean stocks which account for an additional 163,000 tons from month to month. Soybean ending stock levels rose in Argentina but were offset by a decline in U.S. soybean ending stocks, which were forecast lower by 5 percent to 8.2 million tons, as residual use this month was raised based on indications from the Grain Stocks Report. This lower figure is still above last year's level.

Total soybean meal production was increased 185,000 tons reflecting higher output in China, and Brazil's rise was offset by Argentina's nearly equal decline. Similarly, soybean oil production was increased slightly to 26.0 million tons, while U.S. stocks declined 5 percent due to reduced extraction rates and higher domestic use. World production of vegetable oils rose 200,000 tons this month as gains in both palm oil and palm kernel oil were only partially offset by reductions in sunflowerseed oil and olive oil. Global vegetable oil trade rose 170,000 tons to 34.0 million tons due mostly to larger palm oil exports from Malaysia.

FOREIGN AGRICULTURAL SERVICE  
COTTON, OILSEEDS, TOBACCO

**Notes on World Supply/Demand Tables**

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and country designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North	Baltic States	FSU-12	Middle East
Algeria	Estonia	Armenia	Cyprus
Egypt	Latvia	Azerbaijan	Iran
Libya	Lithuania	Byelorussia	Iraq
Morocco		Georgia	Israel
Tunisia	<b>Europe, Eastern</b>	Kazakhstan	Jordan
