# Oilseeds: World Markets and Trade

## Growth in World Soybean Trade Benefits Brazil

Soybean Exports- World and Brazil's Market Share

1998/1999 - 2001/2002

Million Tons

As the demand for soybeans has surged in recent years, Brazil has been able to increase exports both relative to their competitors, as well as in absolute terms. Brazil's exports have grown from 8.9 million tons three years ago to an estimated 17.5 million tons in the coming October-September year. This growth represents a rise in Brazil's world market share from 23.1 percent three years ago, to 30.5 percent expected this coming year. Such a dramatic expansion has been fueled by higher yields and 2.6 million more hectares harvested, which led to more than 10 million additional tons being produced. Growth in overall output has been induced by profitable returns for Brazilian farmers at a time of slim margins for their international competitors. The area increase has been possible because of the devaluation of the Brazilian Real, which has fallen in dollar terms about 56 percent, from 1.193 Reals to the dollar at the beginning of November 1998, to 2.685 Reals to the US dollar on November 1, 2001. Because trade occurs in dollars, the income of farmers in Brazil rises as the real declines in relation to the dollar. Since this increase in reals received is greater than any increase in production inputs purchased in dollars, which is largely limited to certain types of fertilizer, it is increasingly profitable to expand production in Brazil.

## **Situation and Outlook**

---

The forecast for world oilseed production rose 1.5 million tons for November to 322.8 million tons. A boost in the world soybean production forecast, up 1.8 million tons, coupled with an increase in forecast cottonseed production, more than offset a 710,000-ton decline in expected sunflowerseed production this month. Argentina's soybean production is expected to rise 1.0 million tons to 28.0 million tons in the coming crop year as growers continue to show a preference for soybean plantings. Improved soybean yield forecasts for the U.S. also contribute to the rise in world soybean supply with the U.S. production estimate reaching a record 79.5 million tons in 2001. The decline in world sunflowerseed production is in response to lower production forecasts for Argentina, Eastern Europe, and the EU. Wet weather in Argentina has forced growers to cut back on sunflowerseed acreage in favor of soybeans. However, Argentina's sunflowerseed production, at 3.7 million tons, is up nearly 500,000 tons from last year. Tight world sunflowerseed supplies have helped firm prices and increase the potential for improved grower returns leading to the increase in acreage relative to 2000/01.

Exports of major oilseeds are expected to rise 353,000 tons to 70.7 million tons. An increase in Argentina's soybean exports and Australia's rapeseed exports more than offset a lower sunflowerseed export forecast. Lower exports expected from the Ukraine and Russia accounted for nearly half of the decline as domestic crushers push to expand production and exports of sunflowerseed oil. The remaining declines in exports are expected from Eastern Europe and Argentina. World soybean import forecasts for both 2000/01 and 2001/02 were increased this month due to recent trade trends noted for Germany. Reduced availability of sunflowerseed also resulted in a decline in expected EU sunflowerseed imports this month.

The worldwide oilseed crush rose 822,000 tons this month, mirroring the growth in production. Cottonseed and soybeans accounted for most of the additional crush, rising 396,000 tons and 851,000 tons respectively. Reduced sunflowerseed production led to a 448,000-ton decrease in sunflowerseed crush, partially offsetting the gains noted above. The EU accounted for most of the increase in soybean crush this month as the U.S. crush forecast rose only 136,000 tons in November.

Soybean stocks worldwide rose nearly 800,000 tons to 29.8 million tons with the increase equally divided between the U.S. and Argentina. Lower expected sunflowerseed stocks helped reduce the overall increase in world oilseed stocks to 33.4 million tons.

Increased soybean and cottonseed crush offset reduced sunflowerseed crush resulting in a higher world protein meal production forecast this month. In contrast, forecast world vegetable oil production for November declined marginally as reduced sunflowerseed oil production offset increases in soybean and cottonseed oil production. Correspondingly, world protein meal trade increased while the vegetable oil trade forecast declined this month. Vegetable oil stocks were increased this month in response to the increase in soybean oil supplies and adjustments in palm kernel exports.

FOREIGN AGRICULTURAL SERVICE  
COTTON, OILSEEDS, TOBACCO

**Notes on World Supply/Demand Tables**

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

Regional area and country designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:

Africa, North	Baltic States	FSU-12	Middle East
Algeria	Estonia	Armenia	Cyprus
Egypt	Latvia	Azerbaijan	Iran
Libya	Lithuania	Byelorussia	Iraq
Morocco		Georgia	Israel
Tunisia	<b>Europe, Eastern</b>	Kazakhstan	Jordan
