# Oilseeds: World Markets and Trade

## Global Soybean Export Growth Rate Slows in 03/04

Global soybean exports in 2003/04 are forecast at 63.8 million tons, 1.6 percent higher than the estimate for 2002/03. This growth rate is much lower than the previous year's 18 percent due to the forecasted slowdown of growth in China's soybean imports. China is forecast to import 18.5 million tons of soybeans in 2003/04, versus 18.2 million tons in 2002/03. While this still represents some growth, it is insignificant compared to the additional 7.8 million tons of soybeans China imported in 2002/03 compared to 2001/02. China virtually accounted for all the growth in global soybean trade between 2001/02 and 2002/03. With China's forecasted growth in soybean imports slowing this year, the forecast for growth of global soybean trade is also lower. The United States will take the brunt of the export growth rate slowdown, decreasing exports from 28.0 million tons in 2002/03 to a forecasted 26.9 million tons in 2003/04. Both Brazil and Argentina are forecasted to have slight increases in their soybean exports. Forecasted global consumption of soybeans is up five percent over last year at 175 million tons. However, soybean ending stocks are also forecast to expand relative to use, resulting in lower prices for 2003/04.

## **Situation and Outlook**

---

World oilseed production in 2003/04 is expected to reach a record 352.1 million tons, 24.4 million tons higher than in 2002/03. Much of the growth is in South American soybean production, although China, India and the United States are also expected to post significant soybean production increases. U.S. soybean production is projected at 78.5 million tons in 2003/04, up 6 percent from last year. Gains in oilseed production in 2003/04 are also expected for cottonseed up 3.2 million tons, peanuts up 1.9 million tons, sunflowerseed up 2.2 million tons, and rapeseed up 4.8 million tons.

World oilseed exports are projected at 74.4 million tons in 2003/04, a 3-percent increase over 2002/03. Soybean exports are expected to reach 63.8 million tons. U.S. exports are projected at 26.9 million tons, down 4 percent from last year. Brazil, Argentina and Paraguay are expected to make up for declining U.S. shipments with increases in soybean exports of 5 percent, 6 percent and 8 percent, respectively. China, the largest importer of soybeans in the world, is expected to import 18.5 million tons in 2003/04, compared to 18.2 million tons in 2002/03. Other markets showing increases for 2003/04 include the EU, Mexico, Korea, and the Middle East/North Africa region. Ending stocks of soybeans in the U.S. are expected to reach 7.1 million tons, a 68-percent increase over 2002/03.

World rapeseed exports are projected to increase 16 percent with Canada accounting for most of the increase. Exports by Eastern Europe and the EU are expected to decline in 2003/04 in response to lower production. World sunflowerseed exports are projected to increase by 23 percent in 2003/04, as crop size in major producing countries improves.

World oilseed meal exports are projected to increase 7 percent in 2003/04 to 59.6 million tons. Brazil and Argentina are expected to increase their exports of soybean meal by 9 and 4 percent, respectively. Soybean meal exports from the U.S. are expected to remain constant at 5.4 million tons. World trade in sunflowerseed meal is expected to reach 2.2 million tons, representing an increase of 11 percent, with the majority of the increase coming from Argentina and Eastern Europe.

World vegetable oil consumption for 2003/04 is expected to reach a record 98.6 million tons, representing a 4.6 percent rate of growth from last year. Vegetable oil stocks will remain relatively tight despite a projected 5.8 percent increase in production, with palm and soybean oil production rising by 3.4 and 4.8 percent respectively.

and SEEDS DIVISION

**Notes on World Supply/Demand Tables**

- 1) Trade, crush, consumption, and stocks data are aggregated using individual marketing years with the exception of Argentina and Brazil. These two countries are converted to an October-September basis. Marketing years for countries in the Northern Hemisphere begin in the first year shown. Those in the Southern Hemisphere begin in the second year.
- 2) World imports and exports will not balance. This is due to differences in marketing years and time lags between exportation and importation.
- 3) Stocks data are not estimated for all countries.
- 4) Price averages are dollars per bushel for soybeans, dollars per short ton for soybean meal and cents per pound for soybean oil.

**Regional area and country designations in the soybean, soybean meal, and soybean oil supply, distribution, and trade tables are as follows:**

Asia	Africa, North	Baltic States	Latin America	FSU-12
Bangladesh	Algeria	Estonia	Argentina	Armenia
Burma	Egypt	Latvia	Barbados	Azerbaijan
China	Libya	Lithuania	Bolivia	Byelarus
Cambodia	Morocco		Brazil	Georgia
