

# Trade Promotion Authority

## What's at Stake for Washington Agriculture?

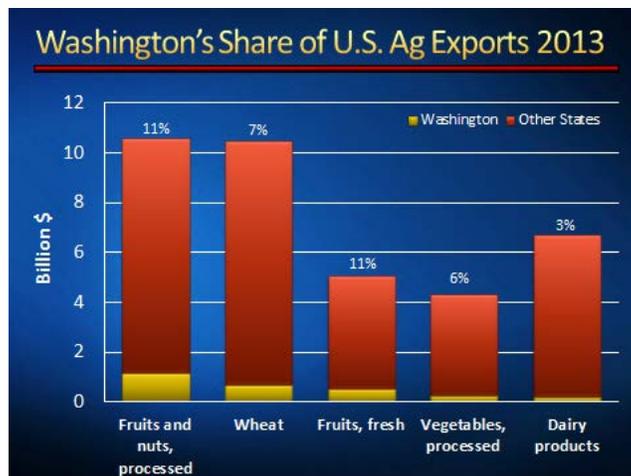

February 2015

Washington is a leading producer and exporter of agricultural products, ranking 9<sup>th</sup> among the 50 U.S. states in the value of its agricultural exports in USDA's most recent calculations. Washington's agricultural exports reached an estimated \$4.5 billion in 2013\*, up from \$2.6 billion in 2009. Washington's exports help boost farm prices and income, while supporting about 34,200 jobs both on the farm and in related industries such as food processing, transportation, and manufacturing.

Washington's top five agricultural exports in 2013 were:

1. Fruits and nuts, processed – \$1.2 billion
2. Wheat – \$706 million
3. Fruits, fresh – \$565 million
4. Vegetables, processed – \$276 million
5. Dairy products – \$216 million

Nationwide, U.S. food and agricultural exports reached a record \$150.5 billion in 2014, supporting more than one million American jobs. Global demand for these products is growing but so is competition among suppliers.

\*State-level export data for 2014 will not be available until October 2015.

### Trade Promotion Authority

Trade Promotion Authority is a critical tool in our efforts to seek approval of trade agreements that support and create U.S. jobs while helping American agriculture to compete more successfully in an ever-expanding global marketplace. Right now, the United States is negotiating two critical trade agreements – the Trans-Pacific Partnership (TPP) and the Transatlantic Trade and Investment Partnership (T-TIP). Trade Promotion Authority will help ensure that America's farmers, ranchers, and food processors receive the greatest benefit from these negotiations.

### Agriculture Benefits from Free Trade Agreements

In countries where the United States has free trade agreements, exports of U.S. food and agricultural products have grown significantly. Examples include our pacts with Colombia, Panama, and South Korea that took effect in 2012; CAFTA-DR, under which our free trade relationships with five Central American countries and the Dominican Republic began between 2006 and 2009; and the U.S.-Chile free trade agreement, which entered into force in 2004.

- **Fresh and processed fruit** exports to Korea, Colombia, and Panama increased from \$367 million in 2011 to \$503 million in 2014. Exports to Central America and the Dominican Republic grew from \$47 million in 2005 to \$129 million in 2014.
- **Tree nut** exports to Korea, Colombia, and Panama increased from \$207 million in 2011 to \$388 million in 2014.
- **Wheat** exports to Central America and the Dominican Republic grew from \$257 million in 2005 to \$501 million in 2014. Wheat exports to Chile increased from \$36 million in 2003 to almost \$92 million in 2014.
