Canada and Mexico are the top export markets for U.S. agriculture, totaling a combined $40 billion in 2018. In fact, more than 29 percent of all U.S. farm and food exports went to our North American neighbors last year. The U.S.-Mexico-Canada Agreement, or USMCA, will make a good trade relationship even better, ensuring preferential market access for U.S. agricultural exporters and solidifying commitments to fair and science-based trade rules.

Key Provisions

**Biotechnology**
For the first time, the agreement specifically addresses agricultural biotechnology – including new technologies such as gene editing – to support innovation and reduce trade-distorting policies.

**Geographical Indications**
The agreement institutes a more rigorous process for establishing geographical indications (GIs) and lays out additional factors to be considered in determining whether a term is a common name.

**Sanitary/Phytosanitary Measures**
The agreement strengthens disciplines for science-based measures that protect human, animal, and plant health while improving the flow of trade.

**Poultry and Eggs**
U.S. poultry producers will have new access to Canada for chicken and eggs, and expanded access for turkey.

**Soybeans**
U.S. soybean growers maintain access to Mexico, their #3 customer, and to a combined market totaling nearly $2.1 billion in 2018.

**Corn**
U.S. corn farmers maintain access to Mexico, their #1 customer, and to a combined market totaling nearly $3.4 billion (27% of total export sales) last year.

**Wheat**
Canada agrees to terminate its discriminatory wheat grading system, enabling U.S. growers along the border to be more competitive.

**Dairy**
America’s dairy farmers will have new market opportunities in Canada for a wide variety of dairy products. Canada agrees to eliminate the Class 7 milk pricing program that allowed its farmers to undersell U.S. producers and will impose export surcharges on dairy products that exceed agreed thresholds.

Top U.S. Agricultural Exports to Canada and Mexico, 2018

1. Corn ($3.4 billion)
2. Prepared Foods ($2.7 billion)
3. Fresh Fruit ($2.2 billion)
4. Soybeans ($2.1 billion)
5. Pork & Pork Products ($2.1 billion)
6. Dairy Products ($2.0 billion)
7. Fresh Vegetables ($2.0 billion)
8. Beef & Beef Products ($1.8 billion)
9. Snack Foods ($1.7 billion)
10. Poultry & Eggs ($1.6 billion)
