

Cotton: World Markets and Trade

Good Start to China State Reserve Sales

China's 2019 State Reserve sales were strong during May although the quantity weakened during the first week of June. Sales started on May 6 with a target of selling 1.0 million tons (4.6 million bales) by September. The State Reserve's total beginning volume is estimated at 2.7 million tons. The mechanism for sales is similar to that used in the previous 2 years: about 10,000 tons in lots are listed daily, ranging between 50 and 400 tons. The lots are auctioned with a reserve price based on the weekly average of foreign cotton (A-Index) and domestic prices adjusted for quality.

As of June 6, about 220,000 tons had been sold representing about 85 percent of the total offered. The majority was sold directly to spinners and the rest to traders with roughly half of the sales having been Xinjiang cotton. The sales rate in May was over 90 percent, but dropped sharply in the first week of June as the base price increased slightly. The average premium above the base price has also been declining from 6-8 percent in the first couple of weeks to less than 1.5 percent last week.

It is expected that nearly all of the available cotton will be sold by the end of the sales period. These anticipated sales are reflected in the current USDA forecasts for both China and world consumption and trade.

Overview

For 2019/20, the forecast shows lower world consumption, mainly in China. Imports in China are also down; global trade and Australia exports are both lower this month. Total ending stocks are slightly higher. The U.S. forecast is unchanged from last month, and the U.S. season-average farm price is projected at 64 cents per pound, down 1 cent.

For 2018/19, world production is forecast up slightly, mostly in India. Trade is higher with greater demand in China and global stocks are also raised this month. The U.S. balance sheet is unchanged, with the U.S. season-average farm price unchanged at 70 cents per pound.

For current prices received by farmers click here; [NASS farm price](#)

Prices

The A-index and the U.S. spot prices were down in May amid trade uncertainty.
